

Delivery terms and conditions Immobilisation at Mineralz Maasvlakte

The following supplementary terms and conditions apply to the delivery of waste products brought to the IMMO plant for immobilisation, in accordance with the associated agreement.

GENERAL:

- These delivery terms and conditions for Immobilisation at Mineralz Maasvlakte are part of the General Terms and Conditions for Mineralz Maasvlakte;
- By handing in a signed consignment note for waste upon delivery, the intermediary/disposer declares that he/she agrees with the rates and present terms and conditions set by Mineralz Maasvlakte as well as with the General Terms and Conditions for Mineralz b.v.

ACCEPTANCE:

- All coarse objects must have been removed from the waste such as metal, plastic, wood and so forth;
- If irregularities are found, Mineralz Maasvlakte will inform the disposer directly. Any costs arising from this will be charged to the disposer;
- If **after** the batch has been treated, it is evident that it has caused damage to the plant, all repair costs and any delays caused to third parties will be charged to the disposer;
- If the batch supplied deviates from the physical and chemical characteristics of the waste stream stated by the disposer beforehand, any costs arising from that will be charged to the disposer;
- If waste (sludge and filter cakes) is delivered on containers/trailers, these must be adequately protected from rainfall entering. If any free water is detected on top of the waste, through which unloading and treatment are no longer deemed possible, we will be forced to send the load back.

Waste with the following properties is **not accepted**:

- waste that is susceptible to self-combustion, is explosive, or could undergo exothermic reactions with air, water or other waste products, or that could develop combustible or poisonous gases;
- waste that is not solid ("cannot be formed");
- waste that gives off a strong-smelling odour;
- waste that could damage the plant equipment;
- waste that is or contains meat, fish or pathological waste;
- waste that exceeds the applicable limits for radioactive materials (requires authorisation);
- waste that falls within one of the categories implemented by the "Besluit stortplaatsen en stortverboden afvalstoffen" (BSSA - Decree on landfills and waste prohibited from landfill), other than exceptions made by a competent authority;
- waste that contains more than 10% of digestible organic material.

OPENING TIMES:

- The IMMO is open continuously on workdays from 07:00 am to 6:00 pm;
- The IMMO is closed on national holidays;
- The IMMO is closed temporarily (for safety reasons) when there are wind speeds of 7 bft (32 mph and above).

VEHICLES:

- Drivers must be able to speak Dutch, German or English to A1 level, basic language skills;
- Unloading dry (waste) materials using a double coupling is not permitted. Lorries with a double coupling will be refused;
- For the connector, the hoses must have a 4" Storz coupling with a cam distance of 133 mm. In case of disasters, the bulk trailer must have a vent cock fitted with a 2" Storz coupling with a cam distance of 66 mm;
- A single coupling is permitted as long as there is sufficient guarantee that this cannot come loose during unloading. The coupling must be secured before you can start unloading. If the coupling is not or cannot be secured, while this coupling is necessary to be able to unload into the Mineralz Maasvlakte silo, the load will be refused;
- Using your 'own' outlet hose is not permitted. Mineralz Maasvlakte will always provide an outlet hose;
- Connecting and disconnecting will only be conducted by the Driver. The operator on duty will fit the safety clamp safety device and remove it once the lorry is at atmospheric pressure;
- Bulk trailers must use the outrigger plates available at the location;
- Unloading can only be done from containers with valves that can be opened from the side of the vehicle; for your and our staff's safety.

SUPPLY:

- Every delivery must have a consignment note for waste cover letter for each waste stream number;
- On the Mineralz Maasvlakte site, the Mineralz Maasvlakte General Terms and Conditions apply;
- Big bags must be delivered on robust pallets;
- Bigbags must not have an inner liner;
- Bigbags must not be stacked;
- To schedule the treatment, please contact Mineralz Maasvlakte.
Direct telephone number +31(0)181-354875 or +31(0)181-363099 or by e-mail immo.maasvlakte@mineralz.com;
- Deliveries can only be made if you have received confirmation from the relevant department.
